

NANDHINI S

Full Stack Java Developer | Java | Angular | JavaScript | REST APIs | SQL | Fintech | Cloud
Relocating to Omaha, NE | (856) 831-2742 | nandhinirao3333@gmail.com

PROFESSIONAL SUMMARY

Full Stack Java Engineer with 3+ years of experience delivering enterprise-grade applications across backend and frontend systems. Skilled in Java, Spring Boot, Angular, React, and REST APIs, with strong expertise in relational and non-relational databases including PostgreSQL and DynamoDB. Experienced in cloud-native development on AWS, CI/CD automation with Docker and Jenkins, and applying SDLC best practices from requirements through deployment. Proficient in analyzing and modernizing legacy applications, improving scalability and reliability, and collaborating in Agile environments. Domain knowledge in financial services, mortgage banking, and trading desk workflows. Comfortable leveraging AI-assisted development tools such as Microsoft Copilot, Claude AI and ChatGPT for code generation, reviews, and documentation.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, SQL, Python

Frameworks & Libraries: Spring Boot, Spring MVC, Hibernate/JPA, Angular, React, Restful APIs, Microservices.

Web Technologies: HTML5, CSS3, REST APIs, JSON, XML

Databases: PostgreSQL, Oracle, MySQL, SQL Server, MongoDB

Database Skills: SQL queries, joins, stored procedures, indexing, query optimization, ETL processes

Testing: JUnit, Mockito, Jasmine, Karma, Test Driven Development (TDD), Manual Testing

DevOps & Tools: Docker, Jenkins, Git, Maven, GitHub Actions

Cloud Platforms: AWS, Azure

Development Practices: Object-Oriented Programming (OOP), Debugging, Code Reviews, Agile/Scrum, Software Development Lifecycle

Operating Systems: Linux/Unix, Windows.

Other Skills: SDLC, Code Reviews, Documentation, Technical Design, Agile Collaboration, AI-assisted Development (Copilot, ChatGPT)

PROFESSIONAL EXPERIENCE

Software Engineer Intern

Alianza — Cloud Communications Platform (Remote, United States) | August 2024 – December 2024

- Assisted in backend development using Java and Spring Boot for cloud communications workflows; contributed to frontend components with Angular.
- Developed SQL queries and optimized PostgreSQL databases for data integrity and performance.
- Participated in Agile sprints, code reviews, and CI/CD deployment workflows using Git and Jenkins.
- Documented APIs and technical design using OpenAPI/Swagger; collaborated with cross-functional teams for testing and feature delivery..

Software Engineer

T-Systems ICT India Pvt. Ltd. — IT Services & Consulting (Bengaluru, India) | September 2021 – December 2023

- Developed, enhanced, and maintained web applications using Java, Spring Boot, Angular, and JavaScript for financial services clients, with direct exposure to fintech domain requirements including transaction processing and reporting systems.

- Analyzed existing application architectures to identify performance bottlenecks and technical debt; collaborated with cross-functional teams to plan and implement modernization improvements across legacy and current systems.
- Built and maintained REST APIs; wrote and optimized SQL queries, stored procedures, and indexes in Oracle and PostgreSQL; ensured application reliability through rigorous testing and proactive maintenance; improved query performance by 30% through schema optimization and indexing.
- Documented technical processes, system designs, and coding practices; participated in code reviews to maintain high-quality standards across the team.
- Applied AI-assisted development tools (Copilot, ChatGPT) to accelerate coding, testing, and documentation processes.
- Used Docker, Jenkins, and GitHub Actions for CI/CD pipeline automation; deployed and supported applications on AWS and Azure cloud platforms.

Business Analyst Intern

BYJU'S — Hyderabad, India | January 2021 – August 2021

- Supported data workflows by writing SQL queries and stored procedures;
- Built dashboards using Power BI and Tableau to present key insights to stakeholders.
- documented business processes and collaborated with development teams to ensure accurate reporting outputs.

EDUCATION

Master of Science in Computer Science

December 2025

Rowan University — Glassboro, NJ

Relevant Coursework: Software Engineering, Database Management Systems, Data Structures & Algorithms, Cloud Computing, Web Development, Computer Networks

ACADEMIC PROJECTS

CareConnect — Patient Scheduling Web Application

Technologies: Java, Spring Boot, Angular, TypeScript, JavaScript, HTML5, CSS3, PostgreSQL, REST APIs, JWT, Docker, Git

- Built a patient scheduling web application as a graduate coursework project using Java/Spring Boot backend and Angular frontend with PostgreSQL for data storage.
- Developed REST APIs, wrote SQL queries and stored procedures, implemented JWT authentication, and used Git for version control throughout the project.

Malicious File & URL Detection System

Technologies: Java, Spring Boot, React, JavaScript, Python, AWS S3, DynamoDB, REST APIs, Docker, Git

- Developed a web-based threat detection tool as a graduate project using a Java/Spring Boot backend and React frontend, with REST APIs for data submission and AWS services for storage.
- Applied basic batch processing patterns to handle file scanning queues; deployed using Docker and managed source control with Git.
